Jeg er lektor og stordyrskirurg (hest, kvæg, får og svin) samt forsker. Mit forskningsområde er nedsat præstation hos hest med specielt fokus på luftvejsproblemer. I det daglige underviser jeg dyrlægestuderende i teori og praktik inden for propædeutik (introduktionskursus til klinisk undervisning). Dette omhandler træning i klinisk undersøgelsesmetodik og kirurgisk teknik. Jeg har været primus motor i udviklingen af et ”Skills Lab”, hvor de studerende trænes i anæstesi, suturering, injektionsteknikker mm inden de går videre på det levende dyr. Vores ”Skills Lab” er i kontinuerlig udvikling for at reducere brugen af levende dyr i undervisningen. Yderligere er jeg ansvarlig for forsøgsdyrene på Universitetshospitalet for Store Husdyr, hvor det er mig meget magtpåliggende, at der tages størst muligt hensyn til velfærden hos dyrene, der anvendes i dyreforsøg.
